

Important Dos and Don'ts

Important DOs:

1. Always stay with the instructor
2. Wear an apron
3. Understand the experimental procedures and safety measures before beginning work
4. Wear necessary safety gear (gloves, goggles, mask, hairband, shoes)
5. In case of any emergency or accident, notify the instructor immediately
6. If you are unclear about any experiment or task assigned to you, ask for guidance from the instructor or supervisor

Important DON'Ts

1. DO NOT enter or stay in an empty lab
2. DO NOT misuse the basic lab safety gear (apron, goggles, masks, etc)
3. DO NOT bring any food or drinks into the lab
4. DO NOT smell or taste any reagent
5. DO NOT attempt to fight fires or chemical spills alone unless it is an immediate emergency
